

This is a leap year. It is believed that the tradition of women proposing on this day goes back to the times when the leap year day was not recognized by English law. Under this theory, if the day had no legal status, it was acceptable to break with the convention of a man proposing.

The chance of being born on a leap day is often said to be one in 1,461. Four years is 1,460 days and adding one for the leap year you have 1,461. So, odds of 1/1,461

About Valentine's Day

Valentine's Day is a celebration of love and lovers. The roots of Valentine's Day go back to ancient times, when people paid honor to the Roman God of fertility.

It's a romantic event for lovers and a fun event for kids and family. Many couples become engaged or wed on this day.

February 14th was formerly thought to be the first day of birds mating for the season. This sparked the custom of sending Valentines to each other.

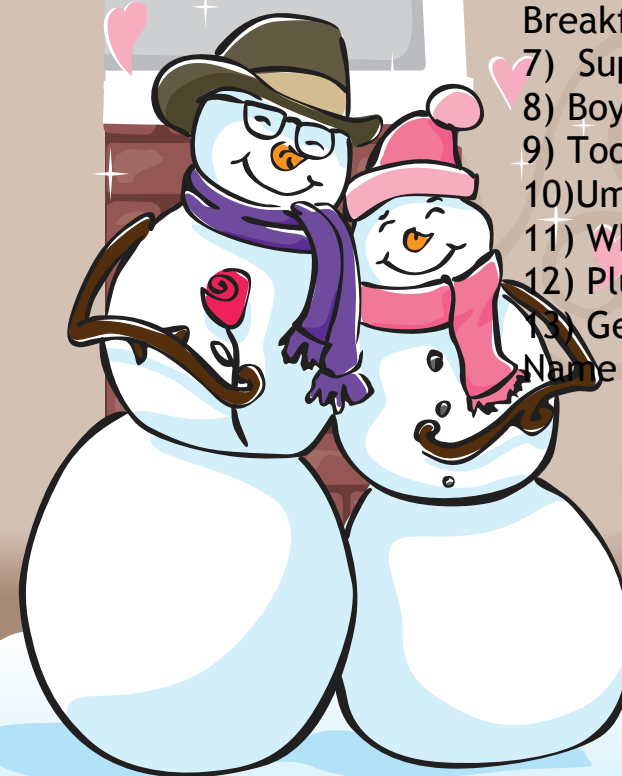

While 75% of chocolate purchases are made by women all year long, during the days and minutes before Valentine's Day, 75% of chocolate purchases are made by men.

On Valentine's Day 2009, 39,897, friends and families got together in Mexico City and kissed for 10 seconds.

It's the world's record for the most simultaneous kisses.
