

" Our spring has come at last with the soft
laughter of April suns and shadow of April showers"
-Byron Caldwell Smith

April is the fourth month of the year in the Gregorian calendar. It was originally the second month of the Roman calendar, before the addition of January and February. No one knows for sure how April got its name. Some say it comes from the latin work aperire, meaning "to poen," alluding to the opening of buds on trees and flowers in springtime. Others say April was named after Aphrodite, and still others say it was named for the goddess Eostre. Whatever the case, April means that spring has arrived.

April Newsletter

Full Moon Pink

Flower of the Month

The full pink moon occurs on April 29. Herb moss pink, or wild ground phlox, is one of the earliest wild flowers to bloom this time of year. As the name infers, the fowers are pink in color, thus the name.

Other names sometimes used are full sprouting grass moon and egg moon.

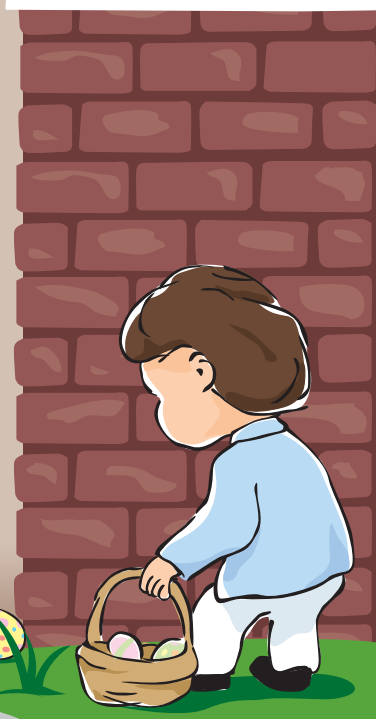

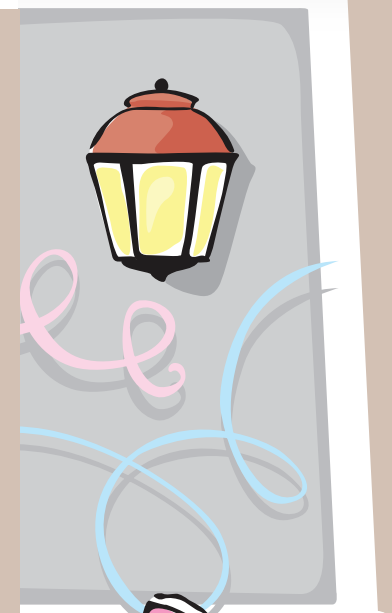

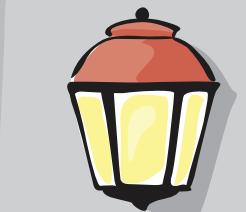

April's flower is the daisy, which has long been a favorite of gardners everywhere. Daisies are beautiful, but they are also very easy to care for and will grow just about anywhere. Daisies are found everywhere in the world except Antartica. Just add water and sun and these little sunbursts add some brightness to any garden. The daisy's Latin name Bellis perennis, translates to "everlasting beauty", revealing just how

cherished this blossom has been throughout the years. Because of their pure white color, they are a symbol of innocence and are considered the flower for children. Daisies are edible and can be used in sandwiches, soups and salads, The leaves can be found in potpourri and can be brewed to make an herbal tea. Daisies also have been used in medicine.
