### October

is a strange month, weather-wise. The first frost usually occurs in October, but days of warm, almost summer-like weather can reappear. Farmers are grateful for these Indian summer days. October, with its beautifully changing foliage, is one of the most colorful months of the year.

is the 10th month of our calendar year, but it was the eighth month of the early Roman calendar and takes its name from Latin word for eight: octo. October's temperatures are ideal for crafting beer, wine, and cider- so much that in Old English it became known as Winmonth, or "wine month", This month also marks the beginning of winter celebrations, dubbed Winterfylleth by Anglo-Saxons.
