Fun Facts of May

- May is the fifth month in the [Gregorian calendar](#) and has 31 days. It is the last month of [astronomical spring](#) in the Northern Hemisphere and of [astronomical fall](#) in the Southern Hemisphere.
- According to tradition, the birthstone for May is the emerald, representing love and success.
- Its birth flowers are the lily of the valley (*Convallaria majalis*) and the common hawthorn (*Crataegus monogyna*), also known as mayflower or maythorn.
- Zodiac Signs
 - Taurus (Bull): [April 20](#) – [May 19](#)
 - Gemini (Twins): [May 20](#) – [June 19](#)
- May 4 is [Star Wars Day](#) because the date, stated as "May the fourth" sounds like the well-known phrase from Star Wars, "May the force be with you." The sentence first appears in *Star Wars: Episode IV – A New Hope* (1977). The characters say it to wish each other good luck.
- In many countries, May Day and [Labor Day](#) are both celebrated on May 1. Labor Day started as International Workers' Day. It goes back to labor unions fighting for an eight-hour working day. After a bloody demonstration known as the Haymarket Riot on May 4, 1886, Chicago's workers' union started their yearly protests on May 1, 1889.
